

VISHWAJEET SHEKHAWAT

Flutter Developer · Team Lead, Mobile Applications

Gwalior, Madhya Pradesh, India | +91-8878125841 | shekhawatvishwajeet062@gmail.com

GitHub: github.com/vishw8878 — full project history, code samples, and live demos below

PROFILE

Flutter developer with 4+ years building and shipping cross-platform mobile and web apps, currently leading a small development team. Strongest in Flutter/Dart — architecture, state management, and taking apps from spec to Play Store. Comfortable working across the rest of the stack (Firebase, MySQL, REST APIs, Node.js/AdonisJS) to integrate and ship complete features, though that side of the stack is working knowledge rather than specialist depth. Active on GitHub, where side projects and experiments are public.

EXPERIENCE

Team Lead / Senior Software Developer — Ubitech Solution Company

4+ years, progressing from Senior Developer to Team Lead

- Lead and mentor a small development team: code review, task breakdown, and delivery against milestones.
- Design and build cross-platform mobile and web applications in Flutter and Dart, from architecture through release.
- Translate business requirements into technical solutions, working directly with stakeholders through the delivery lifecycle.
- Build and integrate REST APIs, authentication flows, local storage, Firebase services, and backend systems.
- Diagnose and resolve production issues; own ongoing stability, maintenance, and enhancement work.
- Participate in architecture decisions, estimation, and QA planning.

SELECTED WORK PROJECTS (UBITECH)

UbiAttendance *Production app*

Employee attendance management app in Flutter, Firebase, and REST APIs. Built GPS + selfie-based check-in/check-out, plus admin tooling to monitor attendance and pull reports.

UbiTrack *Production app*

Location- and asset-tracking application handling live tracking lifecycles — start/stop tracking, background location updates, and history/reporting for field teams.

Visitor Management System (VMS) *Mobile + Web*

Visitor registration, QR-based sharing, deep linking, admin workflows, employee search, status tracking, dashboards, CSV/PDF export.

Any Docs *Android*

Document-sharing app handling Android share intents and cross-app data flows. [Repo →](#)

SELF-DIRECTED PROJECTS

Smaller apps built independently to learn specific pieces of the stack end to end — new APIs, plugins, and architecture patterns outside day-to-day work.

FireNote

Note-taking app built to learn Firebase data modeling and sync end to end. [Live demo →](#)

Aivista

Exploratory Flutter project built to learn integrating AI/vision-style features into a mobile app.

Demo-Sep

Sandbox app for testing isolated features before pulling them into production work: WebRTC audio/video calling, a location-tracking lifecycle module, and Razorpay checkout with payment callbacks.

TECHNICAL SKILLS

Core — 4+ yrs, production depth	Flutter, Dart, cross-platform mobile & web app architecture
State & Local Storage	GetX, Hive
Backend & APIs	REST API integration, Node.js, AdonisJS, Dio
Working knowledge	Firebase (Auth, Firestore, Cloud Messaging), MySQL, PHP basics
Version Control	Git & GitHub — branching, PRs, code review workflows
Deployment	Vercel, Firebase Hosting, Play Store release process
Practices	Agile collaboration, technical documentation, debugging & production support

EDUCATION

M.Sc. Computer Science — Jiwaji University, Gwalior — 2019 — 72%

B.Sc. Computer Science — Jiwaji University, Gwalior — 2017 — 62%
